

STAMPARATUS TEMPLATE

BY KATE MORGAN

I first created a template by cutting a piece of scrap card to fit inside the Stamparatus. Then I punched a 2" circle punch from the left side. Punch another circle in Whisper White and place it in the template. Put the magnet to hold it in place. I took the H and the double I with the line art and placed it on the circle roughly where I wanted it and brought the top acrylic plate down to pick it up. I inked it and stamped it so I could then line up the "e" and "o" and the flower image. Then use the second plate to pick it up. Ink it and see if it stamps in the correct position. If not, you can make any adjustments.

You can see that by using the template and the Stamparatus, you can keep reinking and stamping your images if you don't get the perfect image the first time, or you would like a darker colour!

I made quite a few of these so that I have them handy to put on cards when I need them. I colour each one to coordinate with the project I am working on.
